

## Hosting

If you need a sophisticated, high-performance web site, choose AceSoft Web Hosting for Business. Our most serious package is designed for businesses that require reliability, advanced security features, interactive scripting, plus industry-leading storage and bandwidth capacity. The Professional package includes many more features. AceSoft Web Design has been offering fast, reliable and affordable Windows and Linux web hosting services for small and medium companies! Click [here](#) to sign up today. Once we receive your webhosting application, your web hosting account will be setup within a few hours (if you are located outside of United States). 24hrs for International clients. You will receive a Welcome Letter with your account details. You can upload files straight away using the IP number until your domain name resolves. If you already have an existing Domain Name and you are transferring it to our server from another web hosting server, you will need to delegate the domain name to the name servers below. Alternatively we can do this for you.
